FORMULARY INFORMATION

What is a Formulary?
The Formulary provides a list of covered generic and brand name drugs selected by physician and pharmacist subject matter experts who collaboratively support MedImpact's Pharmacy and Therapeutics (P&T) Committee. This Formulary does not apply to drugs or devices that are obtained through the medical benefit portion of your coverage. The plan will cover drugs listed in the formulary as long as the drug is indicated for the clinical condition, is prescribed in the appropriate manner, the prescription is filled at a participating network pharmacy, and other plan rules are followed. The presence of a prescription drug on the formulary does not guarantee an enrollee will be prescribed that prescription drug by his or her prescribing provider for a particular medical condition. For more information regarding the Formulary or your prescription drug benefit, please contact your plan's Member Services department at (855) 367-7747, or for the hearing and speech impaired TTY: 711, Monday through Friday, between 8:00 am – 5:00 pm PST, or refer to your Plan Benefit Documents, available at https://www.memorialcareselecthealthplan.org.

Can the Formulary (drug list) change?
Drugs may be added or deleted from the Formulary during the policy year, and the Formulary will be updated with any changes on a monthly basis. Changes will be effective on the first day of the month. If there is a change in drug or dosage form, if a drug is removed from the Formulary, if prior authorization, quantity limits and/or step therapy restrictions are added to a drug, or if a drug moves to a higher cost sharing tier, the plan will notify affected enrollees of the change before the change becomes effective. If the FDA deems a drug on the formulary to be unsafe or the drug's manufacturer removes the drug from the market, the plan will immediately remove the drug from the formulary.

The Formulary is subject to change and all previous versions of this formulary are no longer in effect.

How does a member fill a prescription?
To obtain drugs at a participating pharmacy, the enrollee must present his or her pharmacy benefit plan identification card. Except for covered emergencies, claims for drugs obtained without using the identification card will be denied. To locate a participating pharmacy (including specialty pharmacies), check the cost-sharing for a particular drug, or enroll in mail-order, visit https://www.memorialcareselecthealthplan.org . Your plan benefits may restrict coverage of specialty drugs only when obtained from a Network Specialty Pharmacy, except in case of an emergency.

What are generic drugs?
The plan covers both brand name drugs and generic drugs provided they are prescribed per Food and Drug Administration (FDA) approved indications and in accordance with the plan pharmacy benefit coverage. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand name drugs.

How to Use this Formulary Document
The categorical list of drugs in this document groups drugs into categories and classes based on the First National Databank (FDB), a widely-accepted independent drug classification system. A prescription drug may be located by looking up the therapeutic category and class to which the drug belongs or the brand or generic name of the drug in the alphabetical index.

- A drug is listed alphabetically by the brand and generic name in the therapeutic category and class to which it belongs.
- The generic name for a brand name drug is included after the brand name in parentheses and all ***bold and italicized lowercase*** letters.
- If a generic equivalent for a brand name drug is both available and covered, the generic drug will be listed separately from the brand name drug in all ***bold and italicized lowercase*** letters.
- If a generic drug is marketed under a proprietary, trademark protected brand name, the brand name will be listed in all CAPITAL letters after the generic name in parentheses and regular typeface with the first letter of each word capitalized.
- If a generic equivalent for a brand name drug is not available on the market or is not covered, the drug will not be separately listed by its generic name.

For example, the brand name drug Riomet and its generic would be listed as follows:

RIOMET ORAL SOLUTION 500 MG/5 ML (***metformin***)
metformin oral solution 500 mg/5 ml (RIOMET)

Tier Benefit Design
The Formulary applies to a tier benefit design, where the enrollee shares the cost of prescription drug therapy based on the drug's tier and copay or coinsurance. Specialty drugs may be covered at a higher copay or coinsurance. Essential Health Benefit/Preventive Care medications, if available on the plan, will be covered without cost sharing (zero copay). To determine the cost-sharing for each drug tier, refer to your Plan Benefit Documents, available at https://www.memorialcareselecthealthplan.org .

Example of Formulary Tier Design:
- Tier 1: Generic medications
- Tier 2: Preferred brand medications (formulary agents) and for applicable plans, high cost generic medications
- Tier 3: Non-preferred brand medications (non-formulary agents)
- $0: Essential Health Benefit medications intended for preventive care under the Patient Protection and Affordable Care Act (ACA) covered at 100% with no deductible, copay or coinsurance required within coverage criteria

Are there any restrictions on coverage of drugs on the Formulary?
Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:
- **Prior Authorization:** The plan requires enrollees or their prescribing providers to obtain prior authorization for certain drugs. This means that the enrollee will need to obtain approval before the prescription will be covered.
- **Quantity Limits:** For certain drugs, the plan limits the amount of drug that is covered
- **Step Therapy:** In some cases, the plan requires a trial of certain clinically appropriate alternative drug(s) before obtaining the prescribed drug.
- **Age Limit:** For certain drugs, the plan limits coverage of the drug within a determined age limit.

For certain agents within the Formulary, a recommended prescribing guideline may apply. These are denoted throughout the Formulary listing using the following symbols (*refer to table below*).

Symbol	Guidelines	Description
AGE	Age Edit	Coverage depends on patient age.
PA	Prior Authorization	Requires a prior authorization based on specific clinical criteria. *See "**What is a Prior Authorization?**" below for additional information.*
QL	Quantity Limit	Coverage may limited to specific quantities per prescription and/or time period. Prior authorization is required for quantities exceeding the restriction.
ST	Step Therapy	Coverage may depend on previous use of another drug. Prior authorization may be required. *See "**What is Step Therapy?**" below for additional information.*
SP	Specialty Drug	Coverage may require dispensing from a specialty pharmacy. Specialty copay/coinsurance may apply depending on benefit. Prior authorization may be required.
DD	Diabetes Drugs/Devices	Drugs or devices used to treat or manage diabetes

CT	Contraceptives	Drugs used to prevent pregnancy
OCH	Oral Cancer Drugs	Drugs taken by mouth to treat cancer

The enrollee can find out if the drug has any additional requirements or limits by looking within the Formulary.

Are there general exclusions on the formulary?
Many enrollees have specific benefit inclusions, exclusions, copayments, out-of-pocket costs, or a lack of coverage, which are reflected in other Plan Benefit Documents.

The Formulary applies only to outpatient drugs provided to enrollees and does not apply to medications used in inpatient settings. If an enrollee has any specific questions regarding their coverage, they should contact their plan's Member Services department at (855) 367-7747, or for the hearing and speech impaired TTY: 711, Monday through Friday, between 8:00 am – 5:00 pm PST, or refer to your Plan Benefit Documents, available at https://www.memorialcareselecthealthplan.org.

Examples of benefit exclusions:
A. Over-the-Counter (OTC) medications or their equivalents, unless the plan offers coverage of the OTC medications
B. Drugs specifically listed as not covered
C. Any drug product used for cosmetic purposes
D. Medical food/nutritional supplements
E. Non-diabetic supplies/Diagnostic supplies/Ostomy supplies/Devices
F. Disposable needles and syringes (non-insulin related)
G. Any drug products used for cosmetic purposes
H. Experiment drug products or any drug product used in an experimental manner
I. Replacement of lost or stolen medication
J. Repackaged drugs and institutional use drugs (e.g. hospital use)
K. Lifestyle drugs (e.g. sexual dysfunction, infertility)
L. Weight loss drugs
M. Non self-administered injectable drug products unless otherwise specified in the Formulary listing
N. Foreign sourced drugs or drugs not approved by the United States FDA, except in certain cases of drug shortage, when covered under the plan

What if a drug is not on the Formulary? How does an enrollee request an exception to the Formulary?
Medically necessary non-formulary drugs are covered and subject to higher copayments. Enrollees and their prescribing providers may request an exception to any prior authorization or step therapy requirement by indicating the Request for Exception on the Pharmacy Prior Authorization form and submitting the form along with any supporting medical documentation to MedImpact by fax at 1-858-790-7100 or request by phone at 1-800-788-2949. Upon receipt of all required supporting information, MedImpact will review your request and make a decision to approve or deny your request. Decisions for routine requests are issued within 72 hours from the receipt of the complete information. If your provider believes your condition is life-threatening (exigent circumstance), your request will be expedited, and a decision will be issued within 24 hours from the receipt of the information. If a decision is not reached within these timeframes, your request is considered approved.

If your request is approved, your plan shall provide coverage for requests for the duration of the prescription, including refills. If your request is denied, your notice of denial will include information on how to file an appeal. Appeals are responded to within 5 days from the time of receipt, and within 72 hours for expedited appeals (for exigent circumstances). The notice will also include information on how to request an external appeal through the Department of Managed Health Care's Independent Medical Review process.

What is a Prior Authorization?
Many drugs have multiple indications, so prior authorizations are placed on those drugs to make sure the drug is safe and appropriate for the enrollee.

How does the program work?
Drugs that require prior authorization will show PA in the Coverage Requirements and Limits column of the Formulary document. Before these drugs are covered, your prescribing provider must show that you have a medically necessary need for the drug. Drugs requiring prior authorization have specific clinical criteria that you must meet before the drug is covered. Your prescribing provider can work with MedImpact to obtain coverage approval for the drug in the same way as requesting coverage for a non-formulary drug, described above.

What are Quantity Limits?
Coverage for certain drugs may be limited to specific quantities per prescription and/or period of time. Prior authorization is required for quantities exceeding the quantity limit.

What is Step Therapy?
Drugs that require step therapy will show ST in the Coverage Requirements and Limits column of the Formulary document. Step therapy encourages safe and competitively priced medication use through a stepwise approach. This means that before a drug requiring step therapy is covered, you must first try other preferred drugs that treat the same medical condition. After trying other preferred drugs first, then the step therapy drug will be covered. If you are unable to try other preferred drugs first, then your prescribing provider can work with MedImpact to obtain coverage approval for the drug in the same way as requesting coverage for a non-formulary drug, described above.

If you previously completed step therapy for a drug while covered under another plan, you may not be required to repeat step therapy for the drug under this plan. The plan may not limit or exclude coverage for a drug that was previously approved, if your provider continues to prescribe the drug for your medical condition, provided the drug is appropriately prescribed and is safe and effective for treating your medical condition.

Preventive Care
Select over-the-counter (OTC) drugs with a United States Preventive Services Task Force (USPSTF) rating of A or B may be covered at a quantity greater than a 30-day supply. It is your plan's intent to comply with federal law regarding preventive care benefits under the Patient Protection and Affordable Care Act. All prescriptions which qualify for the preventive care benefit, as defined by the appropriate federal regulatory agencies, and which are provided by a network-participating pharmacy, will be covered at 100% with no deductible, copay or coinsurance required. All such medications require a prescription from your doctor.

Members who are stable on their current FDA-approved, self-administered hormonal contraceptive, may receive up to a 12-month supply at one time. Select contraceptives are covered with a $0 copayment.

Diabetes Care
Your outpatient prescription drug coverage includes the following prescription items for the management and treatment of diabetes:

- Insulin
- Needles and syringes for injecting insulin
- Prescription medications for the treatment of diabetes
- Glucagon
- Diabetic testing supplies, including blood and urine testing strips and test tablets, lancets and lancet puncture devices and pen delivery systems for the administration of insulin

Other Pharmacy Items
Some Durable Medical Equipment that is covered through your medical benefit is also available at the pharmacy for the management and treatment of diabetes when medically necessary and authorized:

- Blood glucose monitors, including those designed to assist the visually impaired;
- Insulin pumps and all related necessary supplies;

- Continuous glucose monitors and all related necessary supplies;
- Podiatric devices to prevent or treat diabetes-related complications, including extra-depth orthopedic shoes;
- Visual aids, excluding eyewear and/or video-assisted devices, designed to assist the visually impaired with proper dosing of insulin;

Anti-Cancer Drugs
If you are prescribed a covered, orally administered anti-cancer drug, the total amount of your cost-sharing shall not exceed $250 for an individual prescription for up to a 30-day supply.

Definition of Terms
The following terms apply to your prescription drug coverage and the drug Formulary.

"Brand name drug" is a drug that is marketed under a proprietary, trademark protected name. The brand name drug shall be listed in all CAPITAL letters.

"Coinsurance" is a percentage of the cost of a covered health care benefit that an enrollee pays after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

"Copayment" is a fixed dollar amount that an enrollee pays for a covered health care benefit after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.

"Deductible" is the amount an enrollee pays for covered health care benefits before the enrollee's health plan begins payment for all or part of the cost of the health care benefit under the terms of the policy.

"Drug Tier" is a group of prescription drugs that corresponds to a specified cost sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the enrollee's portion of the cost for the drug.

"Enrollee" is a person enrolled in a health plan who is entitled to receive services from the plan. All references to enrollees in this formulary template shall also include subscribers as defined in this section below.

"Exception request" is a request for coverage of a prescription drug. If an enrollee, his or her designee, or prescribing health care provider submits an exception request for coverage of a prescription drug, the health plan must cover the prescription drug when the drug is determined to be medically necessary to treat the enrollee's condition.

"Exigent circumstances" are when an enrollee is suffering from a health condition that may seriously jeopardize the enrollee's life, health, or ability to regain maximum function, or when an enrollee is undergoing a current course of treatment using a nonformulary drug.

"Formulary" is the complete list of drugs preferred for use and eligible for coverage under a health plan product, and includes all drugs covered under the outpatient prescription drug benefit of the health plan product. Formulary is also known as a prescription drug list.

"Generic drug" is the same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic drug is listed in ***bold and italicized lowercase*** letters**.**

"Nonformulary drug" is a prescription drug that is not listed on the health plan's formulary.

"Out-of-pocket cost" are copayments, coinsurance, and the applicable deductible, plus all costs for health care services that are not covered by the health plan.

"Prescribing provider" is a health care provider authorized to write a prescription to treat a medical condition for a health plan enrollee.

"Prescription" is an oral, written, or electronic order by a prescribing provider for a specific enrollee that contains the name of the prescription drug, the quantity of the prescribed drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is

in writing, and if requested by the enrollee, the medical condition or purpose for which the drug is being prescribed.

"Prescription drug" is a drug that is prescribed by the enrollee's prescribing provider and requires a prescription under applicable law.

"Prior Authorization" is a health plan's requirement that the enrollee or the enrollee's prescribing provider obtain the health plan's authorization for a prescription drug before the health plan will cover the drug. The health plan shall grant a prior authorization when it is medically necessary for the enrollee to obtain the drug.

"Step therapy" is a process specifying the sequence in which different prescription drugs for a given medical condition and medically appropriate for a particular patient are prescribed. The health plan may require the enrollee to try one or more drugs to treat the enrollee's medical condition before the health plan will cover a particular drug for the condition pursuant to a step therapy request. If the enrollee's prescribing provider submits a request for step therapy exception, the health plans shall make exceptions to step therapy when the criteria is met.

"Subscriber" means the person who is responsible for payment to a plan or whose employment or other status, except for family dependency, is the basis for eligibility for membership in the plan.
